Research Paper Presentation Report

Overview:

Students from the **AI & ML Club** actively participated in a **Paper Presentation Competition** organized at **BJS College on 7th March 2026**. The competition aimed to encourage students to explore innovative ideas, conduct research, and present their findings on emerging technologies. It provided a valuable academic platform for students to exchange knowledge, discuss current technological challenges, and showcase their research capabilities. Participation in such competitions helps students develop analytical thinking, improve communication skills, and gain confidence in presenting technical ideas before a wider audience.

The primary objective of participating in this event was to promote research-oriented learning among students and to expose them to the latest developments in the fields of **Artificial Intelligence, Machine Learning, and Software Engineering**. The competition also offered students an opportunity to interact with peers from other institutions and learn about diverse research perspectives.

Program Details:

Two students from the **AI & ML Club** represented the institution and presented their research papers on innovative and socially relevant topics in the field of **Artificial Intelligence and Machine Learning**.

- **Arsh Pathan** presented a research paper titled **"The Impact of AI Tools in the Software Industry: A Catalyst for a Sustainable and Efficient Development Lifecycle."** The paper highlighted how modern AI-powered tools are transforming the software development lifecycle by improving productivity, reducing manual effort, and enabling more efficient and sustainable development practices. The presentation also discussed the role of automation, intelligent code generation, and AI-based testing in modern software engineering.

- **Krushna Saruk** presented a research paper titled **“Fake News Detection in Malayalam Social Media Using Machine Learning.”** The research focused on addressing the growing challenge of misinformation on social media platforms. The paper explained how machine learning algorithms can be used to detect and classify fake news in Malayalam-language social media content. The presentation demonstrated the potential of data-driven approaches in combating misinformation and improving the reliability of online information.

Both students represented the AI & ML Club with great enthusiasm, confidence, and professionalism. They clearly explained the objectives, methodology, and significance of their research work during their presentations. Their ability to communicate complex technical concepts in a clear and structured manner was appreciated. They also actively engaged with the judges and audience during the question-and-answer session, demonstrating a strong understanding of their research topics.

Overall Outcome:

The participation of **Arsh Pathan** and **Krushna Saruk** in the Paper Presentation Competition proved to be a valuable learning experience. It provided them with an excellent platform to showcase their innovative ideas, improve their technical presentation skills, and gain exposure to ongoing research and technological advancements in the domain of Artificial Intelligence and Machine Learning.

The experience also encouraged students to develop a deeper interest in research activities and motivated other members of the AI & ML Club to participate in similar academic and technical events in the future. Such opportunities contribute significantly to the overall academic, professional, and technical development of students while strengthening the culture of innovation and research within the department.
